# For Colortrac SmartLF SCi and SGi models
# Installation and Setup Note – Please read before setting up

**SmartWorks Imaging Trial Included**

All SmartLF SCi and SGi scanner purchases include a 30-day free trial of SmartWorks Imaging, Colortrac's advanced scanning software.
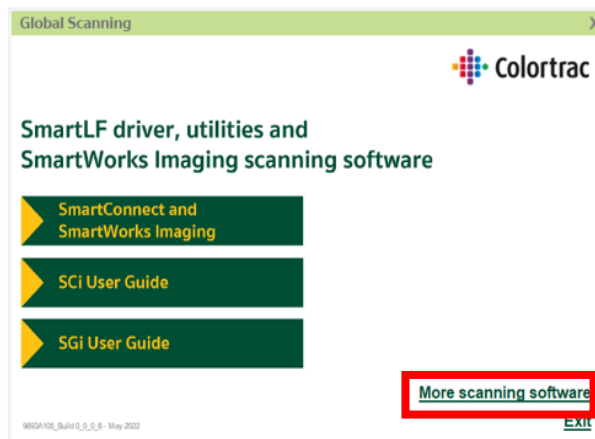

This is installed during the initial installation of the scanner drivers (SmartConnect) and can be used without limitations or restrictions during the trial period.

After the 30-day trial period, the software will require the purchase of a licence key to continue using it. To purchase this, please contact your original equipment reseller for more information.
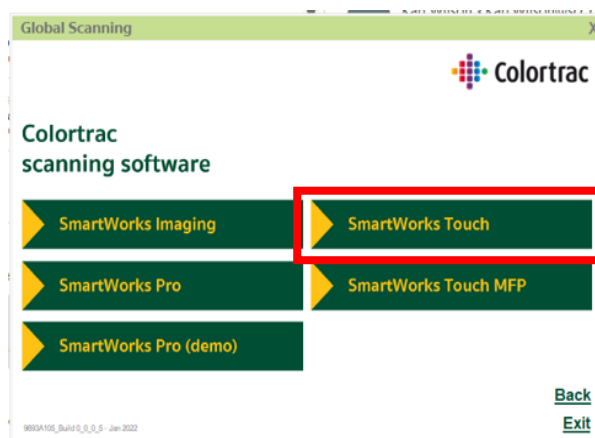

**SmartWorks Touch – Free scanning software**

To install the free-to-use SmartWorks Touch software, after the installation has completed of the SmartConnect drivers and SmartWorks Imaging program, please follow the below steps.

1. On the USB installation media, click on **More scanning software**

2. Click on **SmartWorks Touch** and follow the installation instructions and wizard that follow.

3. If you do not want to try SmartWorks Imaging or purchase the software at the end of the trial period, please follow the steps to remove a program via Windows usual process.

   Do not uninstall SmartConnect as this is required for the scanner to communicate with the computer and also for maintenance processes such as scanner calibration.
